## DESCRIPTION

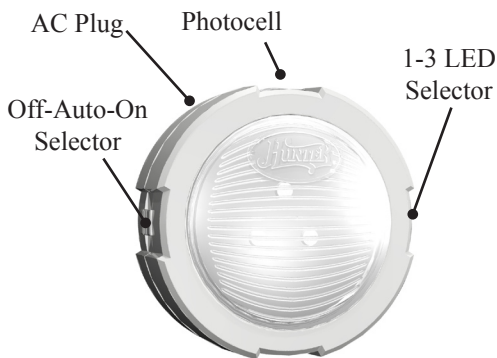

The Hunter IllumiNite™ Multi-Use Light provides light automatically everyday as a night light or during power outages. Perfect for any room in the home, it provides hours of convenient light during power outages, for peace-of-mind.

The IllumiNite™ plugs into a standard household outlet and can be set to illuminate manually or automatically through a photocell sensor. When AC power fails, the IllumiNite™ back-up battery provides super bright LED light. It can be removed from the outlet and used around the house as an area light or flashlight.

When AC power is restored, the IllumiNite™ automatically begins recharging for future use. In the event of a daytime power outage the photocell senses ambient room light to prevent LEDs from turning on and save battery life.

### Features

- For indoor use only
- Can automatically illuminate up to three super bright LEDs when power fails
- Provides daily use as a night light or flashlight
- Photocell turns LEDs on at night and off during the day.
- Provides adjustable lighting levels and battery-saving functionality during power outages:
  - o One LED provides up to 16 hours of light.
  - o Three LEDs provide up to 10 hours of light.
- Built-in rechargeable batteries never need replacing and automatically recharge when the power is restored.

**IllumiNite™ Multi-Use Light**

### AUTO Power Mode Operation (recommended)

If you want your IllumiNite™ to turn on automatically each night or in the event of a power outage, slide the selector to Auto. When the photocell senses darkness it, automatically turns the lights on. On Auto, the LEDs automatically illuminate in the event of a nighttime power failure, and the photocell prevents lights from turning on during a daytime power failure.

In the event of a power outage only one LED illuminates in Auto. This feature saves battery life in case you are asleep or away from home during the power outage. To use three LEDs during a power outage, slide the selector switch to On.

### ON Power Mode Operation

If you want to manually operate your IllumiNite™, use the Off or On modes on the selector switch. Turn the IllumiNite™ On and Off manually each night and day or during a power outage.
